

LD 350 Hemp Thresher

The WINTERSTEIGER LD 350 is a precision thresher for use with individual plants, bundles and small plots: suitable for simultaneous hemp seed and flower recovery and separation.

The LD 350 is well suited for hemp threshing, without breakage, loss of seed or mixing.

Functional principle

- Plants are fed into the threshing unit via the top loading hopper.
- Stepless air speed adjustment means maximum cleaning of the seed.
- Stems are discharged from the end chute. Leaf and flower material is separated from the good seed with each fraction collected in a separate bin.
- Stepless adjustment of the threshing drum speed and multiple concave options ensure simple adjustment for different plant conditions

Loading

Changing the threshing basket

Options

The following mobile versions of the LD 350 are available:

Single axle trailer

Chassis with 2 wheels

Chassis with 4 wheels

Technical Data

Three phase motor	3 x 208-240 V, 60 Hz, 2.3 kW
Single phase motor	208-230 V, 60 Hz, 2.3 kW
Threshing drum	Continuously variable 300 – 1400 rpm

Dimensions	
Measurements	Length: 1850 mm (73") Width: 720 - 1000 mm (28" – 39") Height: 1700 mm (67")
Weight	Approx. 230 kg (507 lbs)

Options	
Gas engine	2.9 kW (4 PS), 169 ccm
Diesel engine	3.5 kW (5 PS), 230 ccm
Chassis	With 2 wheels With 4 wheels (ø 100 mm or ø 260 mm) (ø 4" or ø 10")
Trailer	Single axle trailer without brake with Tow bar and light
